June 22, 2018

Dear Colleagues and Partners!

Please, accept our respect and gratitude for your attention regarding the information we consider might be of importance for you.

As you are supposedly well informed, all the exported products to the Eurasian Economic Union countries (Russia, Belarus, Kazakhstan, Kirgizia and Armenia) are subject to **certification** for compliance with the **technical regulations of the Customs Union**.

The procedure itself of certification is quite sophisticated and requires good knowledge of norms and standards applicable in each particular case and the eventual cost of a mistake may be too high.

In order to avoid unwilling consequences or misunderstandings with your export business partners, border and customs authorities from the above-mentioned countries we would strongly encourage you to make certain enquiries prior to signing contracts or delivering cargoes.

Our company **Certificate Tech Plus** LLC possesses all the necessary information on how to comply all the **certification legal formalities** and save your investments from sanctions and fines. We've worked in this area for almost a decade and have gathered all the best troubleshooting experience for you to be confident of successful result.

Our preliminary phone-call consultation is **free of charge**, so please, do not hesitate to contact our experts and receive a professional business advice. For your convenience, we speak *English, Spanish and Russian*.

Our 24/7 client support service line is available via *phone calls / text messages / internet messengers* – just choose the best way to reach us on **+375 29 399-22-85** number.

English online version of our internet source [www.reglament.by/en](http://www.reglament.by/en) is also at your service together with our email: [expert@reglament.by](mailto:expert@reglament.by).

Best regards,

Director

Kyrill Egorov
